

UNDP/GEF PROJECT ENTITLED "REDUCING ENVIRONMENTAL STRESS IN THE
YELLOW SEA LARGE MARINE ECOSYSTEM"

UNDP/GEF/YS/RWG-E.4/7
Date: 29 August 2007
English only

**Fourth Meeting of the Regional Working Group
for the Ecosystem Component**
Ningbo, China, 3-5 October 2007

Ecosystem Component Activities for 2008 and Onwards

1. Agenda 7 will focus on future activities that need to be approved by the PSC. Keeping in mind that the SAP finalization and demonstration is the main focus of the next two years, members will be invited to review recently completed activities, progress of SAP preparation, and give suggestions on activities that need to be implemented in the future.
2. The past activities that need to be considered for possible continued future implementation are:

Agenda 7.1
CPR Survey 2

3. Following the report from FIO about the CPR survey, members should decide whether follow-up actions are required for this activity, and if so, provide the details for such actions.

Agenda 7.2
OC Validation

4. The Ocean Colour Algorithm final product(s) will contribute to the primary productivity estimation activity. The products might also be used for other purposes, or further development in a second stage. Reviewing this activity together with that of primary productivity estimation, members are invited to provide guidance on how/where the outcomes of the OC activity can be used to meet the Project's objectives.

Agenda 7.3
Other Activities

5. Members are welcome to suggest activities relevant to SAP finalisation and demonstration, e.g. ecosystem monitoring.
