

CALL FOR EXPRESSION OF INTEREST (EOI)

BENEFICIARY COUNTRY:

China and Republic of Korea

REFERENCE NUMBER:

P-I-08-seabasednutrdemo-2162

DESCRIPTION:

To illustrate the efficacy of the Strategic Action Programme's (SAP) management actions, the YSLME Project will conduct demonstration activities of some of the management actions.

The Project seeks institutions or individuals to implement a demonstration activity on **"Monitoring and Assessing Sea-Based Sources of Nutrients"** in order to show the effectiveness of carrying out regular monitoring and assessment of nutrients in an existing mariculture area in the Yellow Sea.

DEADLINE DATE FOR SUBMISSION OF EOI:

22 February 2008

POSTING DATE:

12 February 2008

Objectives and Scope

The "UNDP/GEF Yellow Sea Large Marine Ecosystem (YSLME) Project" aims to facilitate protection and sustainable use of marine and coastal resources in the Yellow Sea. To achieve this objective, the Project has identified management actions in its preparation of the SAP. It is expected that implementing the management actions will mitigate environmental problems in the Yellow Sea and improve its diverse ecosystems.

The Yellow Sea Large Marine Ecosystem is defined in the Project Document as the body of water delineated at the south, by a line connecting the north bank of the mouth of the Chang Jiang (Yangtze River) to the south side of Cheju; at the east, by a line connecting Cheju Island to Jindo Island along the coast of the Republic of Korea; and to the north, a line connecting Dalian to Penglai (on the Shandong Peninsula). This latter line separates the Bohai Sea from the Yellow Sea and as a result is not included in the project.

The demonstration activity will be administered by UNOPS through the Project Management Office in Ansan, Republic of Korea.

Expected Procurement Components**Consulting Services**

***The demonstration activity on "Monitoring and Assessing Sea-based Sources of Nutrients" should address the target of "reduction of total loading from point sources from 2006 levels (China will reduce total N loading from point sources 10% from 2006-2010)." This activity should show the effectiveness of carrying out regular monitoring and assessment of nutrients in an existing mariculture area. It should also provide recommendations to the mariculture industry and policy makers on how

to control total loading, and give some prelude as to how this will contribute to the target to reduce N loading by 10%.***

The activity should also meet the following requirements:

1. carried out necessary activities in a coastal bay containing mariculture activity, and within the geographic scope described below;
2. include 2 survey cruises and use historical data as the basis for information;
3. assess the contribution of sea-based discharge of nutrients to total loadings ;
4. provide management suggestions on reduction of sea-based discharge of nutrients;
5. provide information to the mariculture industry from where major sources of sea-based nutrients are released, so that mariculture industry can improve its sustainability;
6. provide recommendations and examine possibility to meet target as stated above;
7. design preliminary environmental target control regulation; and
8. carry out preliminary co-ordination between government agencies for information exchange.

Qualifications:

- At least 10 years proven track record in the area of coastal and marine research **in the Yellow Sea**.
- Ability to access and co-ordinate activity at mariculture sites in the region.
- Proven history of having good working relationship with mariculture industry and scientists, governments, and other institutions in the region.
- Well established abilities in marine pollution research and monitoring, and analysis of data and information, including Quality Assurance and Quality Control (QA/QC) procedures.
- Good interpersonal skills and ability to work both as a team and individually.
- Working knowledge of English.

Special Procurement Conditions and Additional Information

UNOPS invites suppliers capable of providing the services in above category to submit their expression of interest.

In order to be considered as a potential supplier, interested enterprises should submit their Expression of Interest including the following information:

- **brief presentation of your enterprise including number of staff, turnover, years in business**
- **reference list demonstrating your qualifications for participating in this possible upcoming bidding process**
- **contact information (full name and address, country, telephone and fax numbers, e-mail address, website and contact person)**

The Expression of Interest and accompanying documents must be received by UNOPS no later than 22 February 2008 on the address below.

Expressions of Interest can be sent by e-mail or fax (max. 10 pages) to the contact person below. Please indicate **Ref. No.: P-I-08-seabasednutrdemo-2162** on all submissions.

This call for Expression of Interest does not constitute a solicitation. UNOPS reserves the right to change or cancel the requirement at any time during the EOI and/or solicitation process. UNOPS also reserves the right to require compliance with additional conditions as and when issuing the final solicitation documents. Submitting a reply to a call for EOI does not automatically guarantee receipt of the solicitation documents when issued. Invitations to bid or requests for proposals and any subsequent purchase order or contract will be issued in accordance with the rules and procedures of UNOPS.
